Please ensure you are familiar with the company terms and conditions before you order.

### **Order Quantities and minimums/top ups**

A first time order of any product must be a minimum of 8 in quantity. We strongly advise you to order extra kits in the event of new players joining to avoid having to wait weeks for a new kit. The best way to do this is to order the average size as spares across the team.

**Match day kit top ups/extras/new players** - You can place top up orders for matchday kits at any time. However we strongly suggest that you collate as many top up orders for kits across your club and process them in one go. Having lots of sporadic top up orders over short spaces of time is likely to delay the manufacturing process.

**Off field/training/outerwear top ups** - These must be placed during the top up window which is the first ten days of every month and must be placed with the nominated top up co-ordinator at your club.

**PLEASE NOTE - IF YOU HAVE OFF FIELD, TRAINING OR OUTERWEAR ORDERS OF 10 OR MORE (PER PRODUCT) YOU CAN PLACE THIS AT ANY TIME AND THE WINDOW DOES NOT APPLY.**

**Winter warmers** - Products like bobble hats & snoods are available to order between October 1st - February 15th. You must place order in batches of 8. We cannot make less than 8 of these products at any one time.

### **Final approval and edits**

The designer you are working with can make changes to designs as you request them. However, please note, once an order has been processed - no further changes can be made to the order.

You, the customer, are responsible to check final designs to ensure they are correct and provide approval before we send for manufacture.

### **Response times**

Please understand that our WhatsApp agents have lots of enquiries to deal with, therefore in busy times, we may not reply straight away but will endeavour to do so within 24 hours (although it is usually a lot earlier).

### **Multiple orders over a short space of time**

If your club places multiple orders over a short space of time, our factory may chose to work on these as a batch as this may be the most efficient way to manufacture a 'run' of kits with a similar design. This may delay the lead time of the first order.
